

Ascom Messaging, Assignment, and Reporting Interface (MARi)TM

Introducing the newest way to connect mobile healthcare workers and those in their care. A simple way to create staff assignments, send messages to mobile caregivers, manage configuration settings and even view reporting information. Ascom Telligence[®] or teleCARE IP[®] customers now have their own helper. You have to admit, as your personal assistant, there is something special about MARi.

Key Benefits

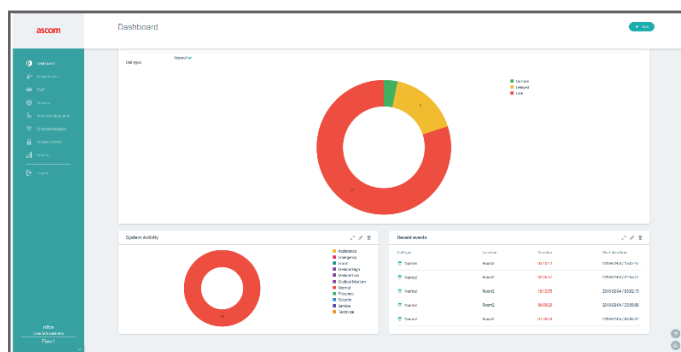

Message escalations can be managed by caregiver, location and event type, ensuring, the right message is delivered to the right person, every time.

Configurable reporting dashboard that allows nurse managers to make informed decisions that help impact care and response times.

Take the hassle out of **assignments** by scheduling them in advance or updating on the fly with an easy to use browser interface.

Ordering Information

System	Item #	Description
teleCARE IP – Telligence	NUAPPSVC-H	MARI, Embedded Nurse Call Application Suite, GTWY2 hardware

Key Features

Messages

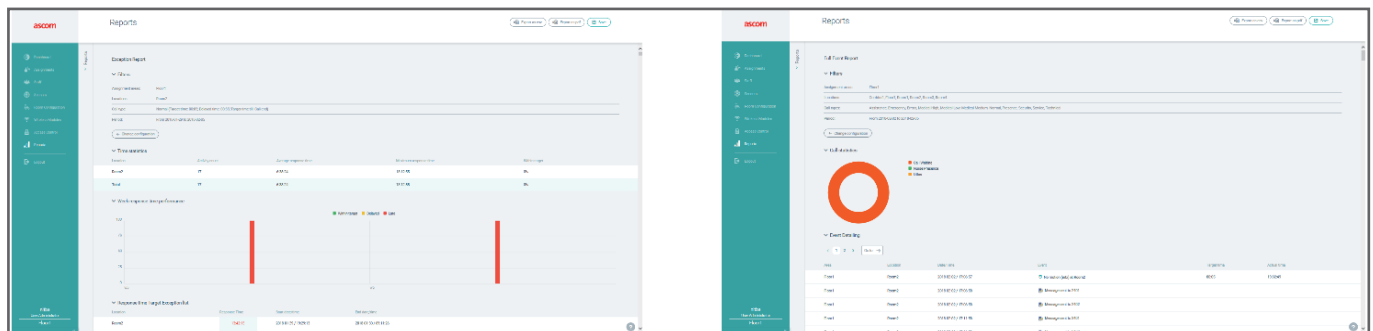

- Message escalation can be managed by caregiver or by location
- Sophisticated summary of events with Dashboard widgets
- Predefined reporting templates simplify data management

Assignments

- Assignments can be fixed (static) or updated by shift
- User interface allows customization for the way you work
- Create assignments ahead of time and activate upon shift start

Reporting

- Ascom report template offers complete visibility for the entire communication process, including mobile messaging accept/reject through room presence in a single report.
- Exception reporting allows settings for target times and thresholds for acceptable responses, allowing managers to identify and address potential issues quickly.
- Reports can be printed, exported or saved in standard .csv and .pdf formats.
