

## DS-KAW150-4N Power Supply

- Short circuit protection, over load protection, and over power voltage protection
- Natural air cooling
- LED power indicator
- 105 °C long life electrolytic capacitor
- 5 seconds 300 VAC surge voltage input tolerance

## ▪ Specification

| General                  |                                                                                               |
|--------------------------|-----------------------------------------------------------------------------------------------|
| Working temperature      | Operating: -10 °C to +70 °C (14 °F to 158 °F)<br>Storage: -25 °C to +85 °C (-13 °F to 185 °F) |
| Working humidity         | < 95% (no condensation)                                                                       |
| Input voltage            | 100 VAC to 240 VAC                                                                            |
| Output voltage           | 48 VDC                                                                                        |
| Output current           | 3.2 A                                                                                         |
| Output power             | 150 W                                                                                         |
| Noise and ripple         | < 150 mVpp @ 25 °C                                                                            |
| Voltage adjustment range | 23 VDC to 25 VDC                                                                              |
| Cooling system           | Convection                                                                                    |
| Dimension (L x W x D)    | 178 mm × 97 mm × 38 mm (7.01" × 3.82" × 1.50")                                                |
| Weight                   | 0.54 kg                                                                                       |

## ▪ Available Model

DS-KAW150-4N
