

DS-K1T805 Series
Access Control Terminal

Quick Start Guide

UD32453B

Quick Guide

1 Installation

- 1.1 Check the environment.
- 1.3 Install the device.

2 Wiring

- 2.1 Normal device wiring.
- 2.2 Wiring with secure door control unit.

3 Quick Operation

- 3.2 Activate the device.
- 3.3 Log in.

Appearance

The pictures here are for reference only.

Card Series

Keypad

Key 5: Hold to enable AP mode
#: Press # to confirm PIN entering.

1 Installation

Before Installation:

- Supports indoor and outdoor use.
- The minimum bearing weight of the wall or other places should be 3 times heavier than the device weight.

- Make sure the gang box is installed on the wall. Gang box is not supplied.
- Secure the mounting plate on the wall with 4 supplied screws (SC-KA4X22). Make sure the cables are through the cable hole.
- Remove the back panel to display the wiring area. Wire the cables and install the back panel back.
Apply Silicone sealant among the cable wiring area to keep the raindrop from entering.
- Align and hang the device with the mounting plate.
Apply Silicone sealant
- Secure the device on the mounting plate with 1 supplied screw (SC-KM3X8-T10-SUS-NL).
For more installation methods, see the user manual.

3.1 Wiring (Normal)

- When connecting door contact and exit button, the device and the RS-485 card reader should use the same common ground connection.
- You should set the device's Wiegand direction as **Input** to connect to a Wiegand card reader. If connects to an access controller, you should set the Wiegand direction as **Output** to transmit authentication information to the access controller. For details about Wiegand direction settings, see *Set Wiegand Parameters* in web configuration.
- The device and the door lock should use separate power supply.
- The suggested external power supply for door lock is 12 V, 1 A.
- The suggested external power supply for Wiegand card reader is 12 V, 1 A.
- Do not wire the device to the electric supply directly.

4 Quick Operation

● Activate Device

Select one of the following methods to activate the device.

--Activate via Mobile Web (With Wi-Fi Function Device Supported)

1. Connect to the device hotspot with your mobile phone by entering the hotspot password. The activation page will pop up.

- If automatic pop-up failed. Enter the device default IP or enter www.acsvis.com in the browser to enter the activation page.
- For inactive devices, device hotspot is enabled by default. The device hotspot name is *AP_Serial Number*, and the hotspot password is the device serial number.
- The device is in the AP mode by default. The AP mode will be disabled after 30 min. Hold key 5 for 10 s to enter the AP mode again.

2. Create a new password (admin password) and confirm the password.

3. Click **Activate**.

4. Enter **Configuration** -> **Communication Settings** -> **Wi-Fi**. And connect to a Wi-Fi. Or edit the IP address via the mobile web, PC web browser and the client software.

- The device hotspot is enabled and is in the AP mode by default and it will be disabled after 30 min.
- If the AP mode is disabled, hold keypad number 5 for 10 s to enable the AP mode again.

--Activate via PC Web

1. Enter the device default IP address (192.0.0.64) in the address bar of the web browser, and press **Enter**.

Make sure the device IP address and the computer's should be in the same IP segment.

2. Create a new password (admin password) and confirm the password.

3. Click **Activate**.

4. Edit the device IP address. You can edit the IP address via the SADP tool or the client software.

--Activate via HikCentral Access Control (HCAC) Web Client

- Login the HCAC and activate license.
- Select **Device** -> **Device and Server**.
- In the Online Device area, view the device status and select inactive devices.
- Click **Activate** to open the device activation window.
- Create a password in the password field, and confirm the password.
- Click **Save** to activate the device.

If you have not set security questions, the window of setting security questions will pop up, and you should select the method of resetting password and set the security questions as needed.

7. Click the edit icon in the Operation column to change the device's IP address, subnet mask, gateway, and so on if needed.

3.2 Device Wiring (With Secure Door Control)

- The secure door control unit should connect to an external power supply separately. The suggested external power supply is 12 V, 0.5 A.
- For scenarios with high safety requirement, use the secure door control unit wiring first. You can ask the technical support to purchase for the secure door control unit separately.
- The picture here are parts of the wiring. For details, see the secure door control unit's user manual.

Characters containing admin and nimda are not supported to be set as activation password. For details, please refer to the user

STRONG PASSWORD RECOMMENDED--
We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

● Login

--Login Mobile Web

1. Connect the mobile phone to the Wi-Fi the same as the device's.

Make sure the device and the PC are in the same IP segment.

2. Open the browser on the mobile phone and enter the device IP address in the address bar and press **Enter** to enter the login page.

3. Enter the device user name and the password.

4. Tap **Login**.

Or hold key 5 for 10 s to enter the AP mode. Enter the mobile phone's Wi-Fi page. Select the device hotspot and enter the hotspot's password (the activation password). The mobile phone will pop up the login page automatically.

--Login PC Web

1. Enter the device IP address in the address bar of the web browser and press **Enter** to enter the login page.

Make sure the device and the PC are in the same IP segment.

2. Enter the device user name and the password.

3. Click **Login**.

For more configuration and operation of HCAC, scan the QR code.

Scan the QR code to get the user manual for more configuration and operation details.

Regulatory Information

FCC Information

Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. FCC compliance: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Conditions

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the RE Directive 2014/53/EU, the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU.

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info

- Warning**
 - In the use of the product, you must be in strict compliance with the electrical safety regulations of the nation and region.
 - CAUTION:** To reduce the risk of fire, replace only with the same type and rating of fuse.
 - CAUTION:** This equipment is for use only with Hikvision's bracket. Use with other (carts, stands, or carriers) may result in instability causing injury.
 - To prevent possible hearing damage, do not listen at high volume levels for long periods.
 - Please use the power adapter, which is provided by normal company. The power consumption cannot be less than the required value.
 - Do not connect several devices to one power adapter as adapter overload may cause over-heat or fire hazard.
 - Please make sure that the power has been disconnected before you wire, install or dismantle the device.
 - When the product is installed on wall or ceiling, the device shall be firmly fixed.
 - If smoke, odors or noise rise from the device, turn off the power at once and unplug the power cable, and then please contact the service center.
 - If the product does not work properly, please contact your dealer or the nearest service center. Never attempt to disassemble the device yourself. (We shall not assume any responsibility for problems caused by unauthorized repair or maintenance.)

- Caution**
 - + identifies the positive terminal(s) of equipment which is used with, or generates direct current. + identifies the negative terminal(s) of equipment which is used with, or generates direct current.
 - No naked flame sources, such as lighted candles, should be placed on the equipment.
 - The USB port of the equipment is used for connecting to a USB flash drive only.
 - The serial port of the equipment is used for debugging only.
 - Burned fingers when handling the fingerprint sensor metal. Wait one-half hour after switching off before handling the parts.
 - Install the equipment according to the instructions in this manual.
 - To prevent injury, this equipment must be securely attached to the floor/wall in accordance with the installation instructions.
 - Do not drop the device or subject it to physical shock, and do not expose it to high electromagnetic radiation. Avoid the equipment installation on vibrations surface or places subject to shock (ignorance can cause equipment damage).
 - Do not place the device in extremely hot (refer to the specification of the device for the detailed operating temperature), cold, dusty or damp locations, and do not expose it to high electromagnetic radiation.
 - The device cover for indoor use shall be kept from rain and moisture.
 - Exposing the equipment to direct sun light, low ventilation or heat source such as heater or radiator is forbidden (ignorance can cause fire danger).
 - Do not aim the device at the sun or extra bright places. A blooming or smear may occur otherwise (which is not a malfunction however), and affecting the endurance of sensor at the same time.
 - Please use the provided glove when open up the device cover, avoid direct contact with the device cover, because the acidic sweat of the fingers may erode the surface coating of the device cover.
 - Please use a soft and dry cloth when clean inside and outside surfaces of the device cover, do not use alkaline detergents.
 - Please keep all wrappers after unpack them for future use. In case of any failure occurred, you need to return the device to the factory with the original wrapper.
 - Transportation without the original wrapper may result in damage on the device and lead to additional costs.
 - Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only.
 - Dispose of used batteries according to the instructions provided by the battery manufacturer.
 - Biometric recognition products are not 100% applicable to anti-spoofing environments.
 - If you require a higher security level, use multiple authentication modes.
 - Please make sure that the biometric recognition accuracy will be affected by the collected pictures' quality and the light in the environment, which cannot be 100% correct.
