

Cloud Manager application

LOGIN – CREATE ICON

When using the already existing control button at **WiFi/BT Controller** or **WiFi/BT Programmer**, your iPhone mobile device indicates an **SSL server error**. The reason is, the iPhone support of **the WiFi/BT Manager application** was discontinued on 09.01.2022 - with the latest development of the iPhone.

You can use the **Cloud Manager** application to replace the previously used **WiFi/BT Manager** application.

No need to re-register, you can re-control your output in a few minutes step by step using the built-in wizard as below. We also recommend it for Android devices.

Download application

Download the **Cloud Manager** application

Apple Store

Creating a control icon in an application

1. Make sure you are logged in with your email address in the **Cloud Manager application**. In the Tools menu, a checkmark at the top of the screen indicates the logged-in status. If there is no checkmark, click the login button and **enter your registered email address and password**.
2. Select the device you want to control in the Devices list.
3. At the bottom of the window that opens, in the **Create icon** line, click the ">" sign.
4. Press the "+" sign in the upper right corner
5. Select the cloud icon to create a control button.
6. Name the control icon (e.g.: Holiday heating, Home gate, Lighting)
7. Select the control icon background color and icon.
8. Set the output control time. (1-65535s)

By clicking the Save button, the **control icon** is ready, it is available on the Control tab in the main menu and is ready for use.

After successful registration, our GSM module is available on www.asccloudmanager.com website.

Thank you for choosing our product!
